

Spin-and-Round

- Materials**
- 1 *Spin-and-Round* Spinner (*Math Masters*, p. G6)
 - 1 *Spin-and-Round* Record Sheet (*Math Masters*, p. G5)
 - number cards 0–8 (4 of each)
 - 1 pencil and 1 large paper clip for the spinner

Players 2

Skill Rounding 6-digit numbers to the nearest hundred through hundred-thousand

Object of the Game To have the greater total score.

Directions

1 Shuffle the cards and place the deck number-side down.

2 Players take turns. When it is your turn:

- Draw 6 number cards to form a number. Place the first card faceup in the hundred-thousands place. Place the next card in the ten-thousands place, and so on, until you place the sixth card in the ones place. Record the starting number on the *Spin-and-Round* Record Sheet.
- Spin the spinner to determine how to round the number. On the record sheet, circle the digit to be rounded.
- Round the number. Record the rounded number on the record sheet.
- Your score for each turn is the place-value digit that was rounded up or that stayed the same. For example, if you round 482,657 to the nearest thousand, you get 483,000. Your score for this turn is 3 because the digit in the thousands place is 3. Record your score on the record sheet.

3 After 6 turns, each player finds the sum of their scores.

4 The player with the greater total score wins the game.

Variation

After spinning, players may rearrange their 6 cards before rounding. Keep in mind that the order of your numbers might help you score more points.

Spin-and-Round Record Sheet

		
NAME _____	DATE _____	TIME _____

Circle the place-value digit in the starting number to indicate the spinner directions. For example, circle the 6 in the starting number 462,017 if you are rounding to the nearest ten-thousand.
